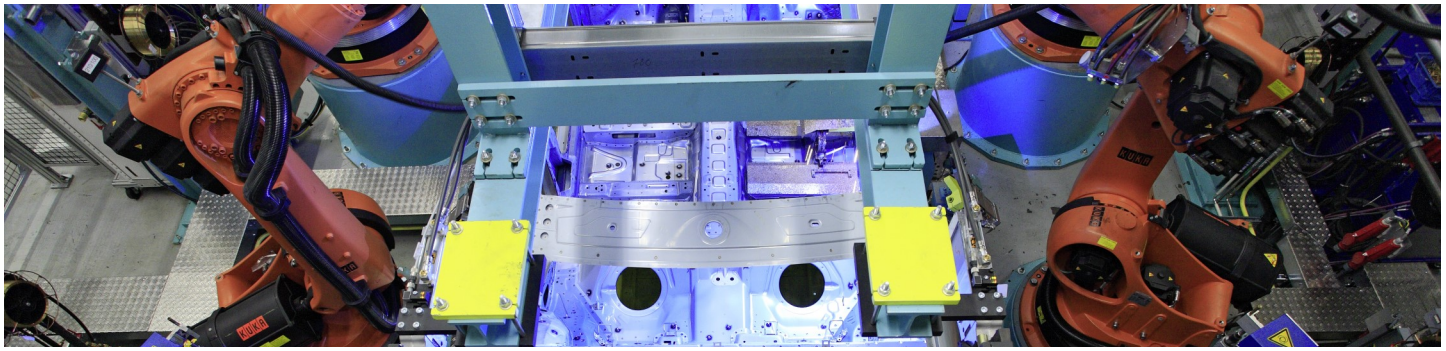
InPro electric

vertrauensvoll | verlässlich | besser



We are looking for our locations in Greer and Chattanooga (USA)

PLC-Programmer/Comissioning engineer
Specializing in automation technology

We as an employer

We are a global company with 400 employees in Germany and 200 employees worldwide. With numerous branches in Germany and abroad, our customers have a partner nearby for their electrical engineering needs. Our main focus is on the automation of production and manufacture, so we work closely with the automotive industry but also use our expertise in many other sectors. We coordinate all joint activities from our headquarters in Wolfsburg.

Are you dedicated and looking for new challenges? Then become part of **InPro electric**!

Your role

- Software design
- PLC programming and commissioning

Your backround

- Completed training in technician or graduate in electrical engineering (Bachelor/Master)
- Experience and familiarity in automation with PLC or industrial robots
- Experience in systems such as Allen Bradley and Siemens

We offer

- Varied work with a high degree of independent design
- Performance-related remuneration with the benefits of a future-oriented company
- Pleasant team-oriented working atmosphere
- Intensive initial training through immediate involvement in projects
- Qualified training and further education

We expect

- Commitment and flexibility
- Interest in new technologies
- Desire for personal development

We are looking forward to your application!
